

CHARTER-
MANAGEMENT IN
MANNHEIM²

Dear Ladies and Gentlemen,

a charter is a grant of authority or rights, stating that the granter formally recognizes the prerogative of the recipient to exercise the rights specified. By working with other countries or cities, we hope not only to boost our economic profits, but provide citizens a better life and make the world a better place.

The city of Mannheim has signed various international charters, developed concepts and action plans in different fields and has largely promoted sustainable activities according to these international obligations. In addition, the city of Mannheim has committed to sustainability by following the guidelines of many national and international institutions. Locally, the Strategic Management Department of the City of Mannheim identifies the relevant content as strategic

sustainability management, bundles the measures derived from it under the topic of holistic sustainability and evaluates the results every year. From here, we can expect to see an overview of how the city of Mannheim deals with the topic of sustainability, how the sustainability sectors can be assigned to the respective charters, and which measures have already been completed and which are currently being implemented.

By working together with other countries or cities, we hope not only to increase our economic benefits, but to enable citizens to live better lives and make the world a better place.

Yours sincerely, Lord Mayor Dr. Peter Kurz

FROM GLOBAL TO LOCAL

Charter Management - "What does this have to do with us in our city?"

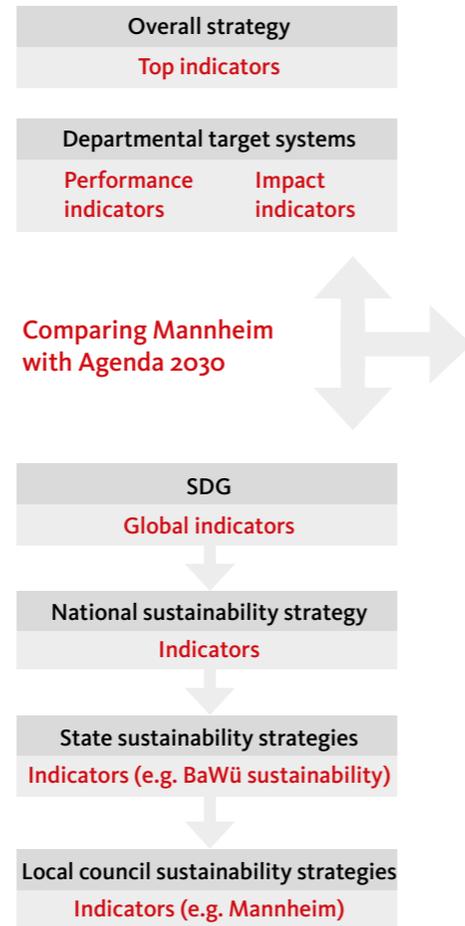

For six years now, the City of Mannheim has been standardising the fulfilment of the international charters by means of its strategic target system. This is done within the framework of the Plan - Do - Check - Act management system.

IMPLEMENTING THE SDGS

Why do the global sustainability goals affect us here in Mannheim and why do we want to introduce them?

In the context of the Agenda 2030 and the Sustainable Development Goals (SDGs), the City of Mannheim has started in 2017 the holistic participatory approach "Mannheim 2030". Its goal is the implemen-

tation of the Agenda 2030 and its SDGs in the specific local context of the City of Mannheim. Together with Mannheim's citizens and important stakeholders from municipal administration, politics, academia and private sector and through various participatory events and open discussion forums, a set of innovative ideas, targets and measures will be summarized in this model for "Mannheim 2030".

Objective:
Mission Statement and Indicator Set Mannheim 2030

budgeting
